Management's Discussion of Fund Performance

SUMMARY OF RESULTS

Global Equity Fund (Class NAV) returned 21.71% for the year ended August 31, 2024. The most significant factors affecting fund performance during the period included declining global inflation and interest rate cuts by several of the world's major central banks, which contributed to a broad global stock market rally.

TOP PERFORMANCE CONTRIBUTORS

Financials stocks | The financials sector was one of the fund's largest weightings and was the top-performing sector.

Microsoft Corp. | The technology giant benefited from strong growth for its Azure cloud computing services and AI-related Copilot products.

Sumitomo Mitsui Financial Group, Inc. | Strong results, higher earnings guidance, and increased expectations for rising Japanese interest rates boosted the stock of this Japanese financial services provider.

TOP PERFORMANCE DETRACTORS

Cisco Systems, Inc. | The networking products company lowered revenue guidance and entered into an inventory correction cycle, which weighed on the stock.

FMC Corp. | Distorted global weather patterns and high inventory levels reduced demand for the company's crop protection products.

Fund Performance

The following graph compares the initial and subsequent account values at the end of each of the most recently completed 10 fiscal years of the fund (or for the life of the fund, if shorter). It assumes a \$10,000 initial investment in the fund and in an appropriate, broad-based securities market index for the same period.

GROWTH OF \$10,000

AVERAGE ANNUAL TOTAL RETURN	1 Year	5 Years	10 Years
Global Equity Fund (Class NAV)	21.71%	11.21%	8.30%
MSCI World Index	24.43%	13.11%	9.57%

The fund has designated MSCI World Index as its broad-based securities market index in accordance with the revised definition for such an index.

Performance figures assume all distributions have been reinvested and reflect the beneficial effect of any expense reductions. Past performance does not guarantee future results. The return and principal value of an investment will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Due to market volatility and other factors, the fund's current performance may be higher or lower than the performance shown. The graph and table do not reflect the deduction of taxes that a shareholder would pay on fund distributions or redemption of fund shares. It is not possible to invest directly in an index.
