Management's Discussion of Fund Performance

SUMMARY OF RESULTS

Investment Grade Bond Fund (Class I/TIUSX) returned 1.91% for the year ended May 31, 2024. The bond market posted a gain in the annual period. Bond prices experienced volatility due to the combination of persistent inflation and uncertainty as to when the U.S. Federal Reserve would begin to cut interest rates, but total returns were positive thanks to a sizable contribution from income. Corporate bonds performed particularly well on the strength of better-than expected economic growth, steady earnings, and robust investor risk appetites.

TOP PERFORMANCE CONTRIBUTORS

Corporate bonds | Corporates were the strongest performing segment of the portfolio in the annual period, with the largest contribution coming from the banking and energy sectors.

Securitized assets | Agency mortgage-backed and asset-backed securities, while delivering smaller gains, also finished firmly in positive territory and aided fund performance.

TOP PERFORMANCE DETRACTORS

Duration (interest rate sensitivity) | Rising bond yields put downward pressure on bond prices, detracting from fund performance.

Specific holdings in U.S. Treasuries and corporate bonds | Many of the fund's holdings in U.S. Treasuries lost ground, and certain positions in investment-grade and high-yield corporate bonds finished with negative returns, as well. At the individual security level, Wells Fargo & Co. was a notable detractor.
