Management's Discussion of Fund Performance

SUMMARY OF RESULTS

Regional Bank Fund (Class A/FRBAX) returned 53.63% (excluding sales charges) for the year ended October 31, 2024. Markets moved higher amid positive investor sentiment driven by expectations of rate cuts and a resilient U.S. economy. AI optimism fueled gains in stocks and, as a result, the broader market for much of the year. In the closing months of the period, Federal Reserve interest rate cuts propelled rate-sensitive sectors and value stocks higher. In this environment, the top performing sectors included technology, telecommunication services and financials.

TOP PERFORMANCE CONTRIBUTORS

Regional banks | Regional banks continued to exhibit solid profitability with healthy capital and liquidity levels, while maintaining low credit levels. This sub-industry was the strongest contributor to fund performance with its holdings in M&T Bank Corp., Citizens Financial Group, Inc. and Huntington Bancshares, Inc.

Diversified banks | Another sub-industry that contributed to performance was diversified banks, which benefited from the same tailwinds that supported regional bank performance. The larger diversified banks that made the most substantial contributions to performance included Fifth Third Bancorp, JPMorgan Chase & Co., and KeyCorp.

TOP PERFORMANCE DETRACTORS

Specific holdings | While regional bank holdings within the fund largely outperformed, a few individual securities finished with losses, including Flagstar Financial, Riverview Bancorp, Inc. and California BanCorp.

Sub-industry | The total contribution of diversified banks to the fund's performance lagged relative to regional banks although each of the fund's holdings within this sub-industry provided positive returns.
