# A *message* to shareholders

Dear shareholder,

Both stocks and bonds largely posted gains during the six months ended February 29, 2024. Concerns that interest rates would need to stay higher for longer led to a sharp increase in bond yields and weighed heavily on investor sentiment through late October. These worries rapidly dissipated in November, however, following a stretch of favorable inflation readings and more dovish comments from central bank officials. Stocks moved quickly off their previous lows in response and the U.S. Federal Reserve added fuel to the rally in December by indicating that the central bank may begin to cut rates later in 2024. Stocks surged in response, and the momentum continued through the end of the period. International stocks also gained, but their performance wasn't as robust. Short- and intermediate-term bond yields fell, while longer-term yields were flat to slightly higher. High-yield and investment-grade corporate bonds delivered the strongest returns for the period.

In these uncertain times, your financial professional can assist with positioning your portfolio so that it's sufficiently diversified to help meet your long-term objectives and to withstand the inevitable bouts of market volatility along the way.

On behalf of everyone at John Hancock Investment Management, I'd like to take this opportunity to welcome new shareholders and thank existing shareholders for the continued trust you've placed in us.

Sincerely,

**Kristie M. Feinberg**

# Multimanager Lifetime Portfolios' strategy at a glance

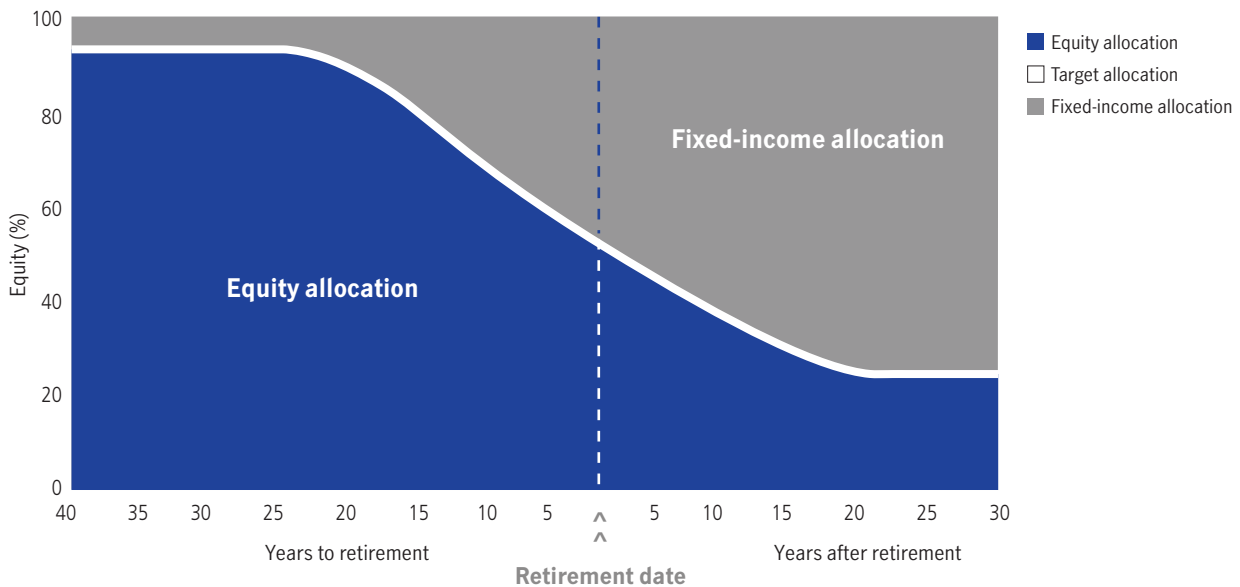

## A SIMPLE, STRATEGIC PATH TO HELP YOU REACH YOUR RETIREMENT GOALS

Multimanager Lifetime Portfolios make diversification easy because the asset mix of each portfolio automatically changes over time.

- Portfolios with dates further off initially invest more aggressively in stock funds.
- As a portfolio approaches its target date,<sup>1</sup> the allocation will gradually migrate to more conservative fixed-income funds.
- Once the target date is reached, the allocation will continue to become increasingly conservative until it reaches the end of its glide path, investing primarily in fixed-income funds.

## JOHN HANCOCK MULTIMANAGER LIFETIME PORTFOLIOS—AUTOMATICALLY ADJUST OVER TIME<sup>2</sup>

The chart below illustrates how the asset allocation mix of John Hancock Multimanager Lifetime Portfolios adjusts over time.

**The principal value of each portfolio is not guaranteed and you could lose money at any time, including at or after the target date.**

<sup>1</sup> Based on an estimated retirement date.

<sup>2</sup> Allocations may vary as a result of market activity or cash allocations held during unusual market or economic conditions.

**Notes about risk**

The portfolios may be subject to various risks as described in the portfolios' prospectuses. Political tensions, armed conflicts, and any resulting economic sanctions on entities and/or individuals of a particular country could lead such a country into an economic recession. A widespread health crisis such as a global pandemic could cause substantial market volatility, exchange trading suspensions and closures, which may lead to less liquidity in certain instruments, industries, sectors or the markets generally, and may ultimately affect portfolio performance. For more information, please refer to the "Principal risks" section of the prospectuses.

## Your expenses

As a shareholder of a John Hancock Funds II Multimanager Lifetime Portfolio, you incur two types of costs: (1) transaction costs, including sales charges (loads) on certain purchases or redemptions, and (2) ongoing costs, including management fees, distribution and service (Rule 12b-1) fees, and other portfolio expenses. In addition to the operating expenses which each portfolio bears directly, each portfolio indirectly bears a pro rata share of the operating expenses of the underlying funds in which each portfolio invests. Because underlying funds have varied operating expenses and transaction costs, and a portfolio may own different proportions of the underlying funds at different times, the amount of expenses incurred indirectly by the portfolio will vary. Had these indirect expenses been reflected in the following analysis, total expenses would have been higher than the amounts shown.

These examples are intended to help you understand your ongoing costs (in dollars) of investing in a portfolio so you can compare these costs with the ongoing costs of investing in other mutual funds. The examples are based on an investment of \$1,000 at the beginning of the period and held for the entire period (September 1, 2023 through February 29, 2024).

### Actual expenses:

The first line of each share class in the following table provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses paid during period ended" to estimate the expenses you paid on your account during this period.

### Hypothetical example for comparison purposes:

The second line of each share class in the following table provides information about hypothetical account values and hypothetical expenses based on the actual expense ratio for the share class and an assumed annualized rate of return of 5% per year before expenses, which is not the actual return of the share class. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in a portfolio and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds. Please remember that these hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs. Therefore, the second line of each share class in the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher. See the portfolios' prospectuses for details regarding transaction costs.

<sup>1</sup> Based on average daily shares outstanding.

<sup>2</sup> Net investment income is affected by the timing and frequency of the declaration of dividends by the underlying funds in which the portfolio invests.

<sup>3</sup> Total returns would have been lower had certain expenses not been reduced and other income not been received from the Advisor for reimbursement of indirect net expenses associated with the portfolio's investments in underlying investment companies during the applicable periods.

<sup>4</sup> Does not reflect the effect of sales charges, if any.

<sup>5</sup> Ratios do not include expenses indirectly incurred from underlying funds and can vary based on the mix of underlying funds held by the portfolio.

<sup>6</sup> Six months ended 2-29-24. Unaudited.

<sup>7</sup> Net investment income (loss) per share and net investment income (loss) ratio reflect other income received from the Advisor for reimbursement of indirect net expenses associated with the portfolio's investments in underlying investment companies of less than \$0.005, \$0.005, \$0.01, \$0.02, \$0.01, and \$0.02 per share and 0.06%, 0.05%, 0.08%, 0.11%, 0.12%, and 0.16%, for the periods ended 2-29-24, 8-31-23, 8-31-22, 8-31-21, 8-31-20 and 8-31-19, respectively.

<sup>1</sup> Based on average daily shares outstanding.

<sup>2</sup> Net investment income is affected by the timing and frequency of the declaration of dividends by the underlying funds in which the portfolio invests.

<sup>3</sup> Total returns would have been lower had certain expenses not been reduced and other income not been received from the Advisor for reimbursement of indirect net expenses associated with the portfolio's investments in underlying investment companies during the applicable periods.

<sup>4</sup> Does not reflect the effect of sales charges, if any.

<sup>5</sup> Ratios do not include expenses indirectly incurred from underlying funds and can vary based on the mix of underlying funds held by the portfolio.

<sup>6</sup> Six months ended 2-29-24. Unaudited.

<sup>7</sup> Net investment income (loss) per share and net investment income (loss) ratio reflect other income received from the Advisor for reimbursement of indirect net expenses associated with the portfolio's investments in underlying investment companies of less than \$0.005, less than \$0.005, \$0.01, \$0.01, \$0.01, and \$0.02 per share and 0.05%, 0.04%, 0.08%, 0.11%, 0.12%, and 0.16%, for the periods ended 2-29-24, 8-31-23, 8-31-22, 8-31-21, 8-31-20 and 8-31-19, respectively.

<sup>1</sup> Based on average daily shares outstanding.

<sup>2</sup> Net investment income is affected by the timing and frequency of the declaration of dividends by the underlying funds in which the portfolio invests.

<sup>3</sup> Total returns would have been lower had certain expenses not been reduced and other income not been received from the Advisor for reimbursement of indirect net expenses associated with the portfolio's investments in underlying investment companies during the applicable periods.

<sup>4</sup> Does not reflect the effect of sales charges, if any.

<sup>5</sup> Ratios do not include expenses indirectly incurred from underlying funds and can vary based on the mix of underlying funds held by the portfolio.

<sup>6</sup> Six months ended 2-29-24. Unaudited.

<sup>7</sup> Net investment income (loss) per share and net investment income (loss) ratio reflect other income received from the Advisor for reimbursement of indirect net expenses associated with the portfolio's investments in underlying investment companies of less than \$0.005, less than \$0.005, less than \$0.005, \$0.01, \$0.01, and \$0.02 per share and 0.03%, 0.02%, 0.04%, 0.08%, 0.09%, and 0.15%, for the periods ended 2-29-24, 8-31-23, 8-31-22, 8-31-21, 8-31-20 and 8-31-19, respectively.

## Note 1 — Organization

John Hancock Funds II (the Trust) is an open-end management investment company organized as a Massachusetts business trust. The Trust is registered under the Investment Company Act of 1940, as amended (the 1940 Act). It is a series company with multiple investment series, twelve of which are presented in this report (collectively, Multimanager Lifetime Portfolios, or the portfolios and individually, the portfolio). The portfolios operate as “funds of funds” that may invest in affiliated underlying funds of the Trust, other funds in the John Hancock group of funds complex, non-John Hancock funds and certain other permitted investments.

The portfolios may offer multiple classes of shares. The shares currently offered by the portfolios are detailed in the Statements of assets and liabilities. Class A shares are offered to all investors. Class I shares are offered to institutions and certain investors. Class R2, Class R4 and Class R5 shares are available only to certain retirement and 529 plans. Class R6 shares are only available to certain retirement plans, institutions and other investors. Class 1 shares are offered only to certain affiliates of Manulife Financial Corporation. Shareholders of each class have exclusive voting rights to matters that affect that class. The distribution and service fees, if any, and transfer agent fees for each class may differ.

The investment objective of each portfolio is to seek high total return through the portfolio’s target retirement date, with a greater focus on income beyond the target date. Total return, commonly understood as the combination of income and capital appreciation, includes interest, capital gains, dividends, and distributions realized over a given period of time.

The accounting policies of the underlying funds in which the portfolios invest are outlined in the underlying funds’ shareholder reports, which include the underlying funds’ financial statements. These are available on the Securities and Exchange Commission (SEC) website at [sec.gov](http://sec.gov). John Hancock underlying funds’ shareholder reports are also available without charge by calling 800-225-5291 or visiting [jhinvestments.com](http://jhinvestments.com). The underlying funds are not covered by this report.

## Note 2 — Significant accounting policies

The financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America (US GAAP), which require management to make certain estimates and assumptions as of the date of the financial statements. Actual results could differ from those estimates and those differences could be significant. The portfolios qualify as investment companies under Topic 946 of Accounting Standards Codification of US GAAP.

Events or transactions occurring after the end of the fiscal period through the date that the financial statements were issued have been evaluated in the preparation of the financial statements. The following summarizes the significant accounting policies of the portfolios:

**Security valuation.** Investments are stated at value as of the scheduled close of regular trading on the New York Stock Exchange (NYSE), normally at 4:00 P.M., Eastern Time. In case of emergency or other disruption resulting in the NYSE not opening for trading or the NYSE closing at a time other than the regularly scheduled close, the net asset value (NAV) may be determined as of the regularly scheduled close of the NYSE pursuant to the Valuation Policies and Procedures of the Advisor, John Hancock Investment Management LLC.

In order to value the securities, the portfolios use the following valuation techniques: Investments in affiliated underlying funds and other open-end mutual funds, including John Hancock Collateral Trust, are valued at their respective NAVs each business day. Equity securities, including exchange-traded or closed-end funds, are typically valued at the last sale price or official closing price on the exchange or principal market where the security trades. In the event there were no sales during the day or closing prices are not available, the securities are valued using the last available bid price. Debt obligations are typically valued based on evaluated prices provided by an independent pricing vendor. Independent pricing vendors utilize matrix pricing, which takes into account factors such as institutional-size trading in similar groups of securities, yield, quality, coupon rate, maturity, type of issue, trading characteristics and other market data, as well as broker supplied prices.

In certain instances, the Pricing Committee of the Advisor may determine to value equity securities using prices obtained from another exchange or market if trading on the exchange or market on which prices are typically obtained did not open for trading as scheduled, or if trading closed earlier than scheduled, and trading occurred as normal on another exchange or market.

Other portfolio securities and assets, for which reliable market quotations are not readily available, are valued at fair value as determined in good faith by the Pricing Committee following procedures established by the Advisor and adopted by the Board of Trustees. The frequency with which these fair valuation procedures are used cannot be predicted and fair value of securities may differ significantly from the value that would have been used had a ready market for such securities existed.

The portfolios use a three tier hierarchy to prioritize the pricing assumptions, referred to as inputs, used in valuation techniques to measure fair value. Level 1 includes securities valued using quoted prices in active markets for identical securities, including registered investment companies. Level 2 includes securities valued using other significant observable inputs. Observable inputs may include quoted prices for similar securities, interest rates, prepayment speeds and credit risk. Prices for securities valued using these inputs are received from independent pricing vendors and brokers and are based on an evaluation of the inputs described. Level 3 includes securities valued using significant unobservable inputs when market prices are not readily available or reliable, including the Advisor’s assumptions in determining the fair value of investments. Factors used in determining value may include market or issuer specific events or trends, changes in interest rates and credit quality. The inputs or methodology used for valuing securities are not necessarily an indication of the risks associated with investing in those securities. Changes in valuation techniques and related inputs may result in transfers into or out of an assigned level within the disclosure hierarchy.

The following is a summary of the values by input classification of the portfolios’ investments as of February 29, 2024, by major security category or type:

Level 3 includes securities valued at \$0. Refer to Portfolios' investments.

**Inflation-indexed bonds.** Inflation-indexed bonds are securities that generally have a lower coupon interest rate fixed at issuance but whose principal value is periodically adjusted based on a rate of inflation, such as the Consumer Price Index. Over the life of an inflation-indexed bond, interest is paid on the inflation adjusted principal value as described above. Increases in the principal amount of these securities are recorded as interest income. Decreases in the principal amount of these securities may reduce interest income to the extent of income previously recorded. If these decreases are in excess of income previously recorded, an adjustment to the cost of the security is made.

**Stripped securities.** Stripped securities are financial instruments structured to separate principal and interest cash flows so that one class receives principal payments from the underlying assets (PO or principal only), while the other class receives the interest cash flows (IO or interest only). Both PO and IO investments represent an interest in the cash flows of an underlying stripped security. If the underlying assets experience greater than anticipated prepayments of principal, the portfolios may fail to fully recover its initial investment in an IO security. The market value of these securities can be extremely volatile in response to changes in interest rates or prepayments on the underlying securities. In addition, these securities present additional credit risk such that the portfolios may not receive all or part of its principal or interest payments because the borrower or issuer has defaulted on its obligation.

**Security transactions and related investment income.** Investment security transactions are accounted for on a trade date plus one basis for daily NAV calculations. However, for financial reporting purposes, investment transactions are reported on trade date. Interest income is accrued as earned. Interest income includes coupon interest and amortization/accretion of premiums/discounts on debt securities. Debt obligations may be placed in a non-accrual status and related interest income may be reduced by stopping current accruals and writing off interest receivable when the collection of all or a portion of interest has become doubtful. Capital gain distributions from underlying funds are recorded on ex-date. Dividend income is recorded on ex-date, except for dividends of certain foreign securities where the dividend may not be known until after the ex-date. In those cases, dividend income, net of withholding taxes, is recorded when the portfolio becomes aware of the dividends. Non-cash dividends, if any, are recorded at the fair market value of the securities received. Gains and losses on securities sold are determined on the basis of identified cost and may include proceeds from litigation. Return of capital distributions from underlying funds, if any, are treated as a reduction of cost.

**Overdraft.** The portfolios may have the ability to borrow from banks for temporary or emergency purposes, including meeting redemption requests that otherwise might require the untimely sale of securities. Pursuant to the portfolios' custodian agreement, the custodian may loan money to the portfolios to make properly authorized payments. The portfolios are obligated to repay the custodian for any overdraft, including any related costs or expenses. The custodian may have a lien, security interest or security entitlement in any portfolio property that is not otherwise segregated or pledged, to the extent of any overdraft, and to the maximum extent permitted by law. Overdrafts at period end, if any, are presented under the caption Due to custodian in the Statements of assets and liabilities.

**Line of credit.** The portfolios and other affiliated funds have entered into a syndicated line of credit agreement with Citibank, N.A. as the administrative agent that enables them to participate in a \$1 billion unsecured committed line of credit. Excluding commitments designated for a certain fund and subject to the needs of all other affiliated funds, a portfolio can borrow up to an aggregate commitment amount of \$750 million, subject to asset coverage and other limitations as specified in the agreement. A commitment fee payable at the end of each calendar quarter, based on the average daily unused portion of each line of credit, is charged to each participating portfolio based on a combination of fixed and asset-based allocations and is reflected in Other expenses on the Statements of operations. For the six months ended February 29, 2024, the portfolios had no borrowings under the line of credit.

Commitment fees for the six months ended February 29, 2024 were as follows:

Portfolio	Commitment fee
Multimanager 2065 Lifetime Portfolio	\$1,814

Portfolio	Commitment fee
Multimanager 2060 Lifetime Portfolio	\$2,109
Multimanager 2055 Lifetime Portfolio	2,304

Multimanager 2020 Lifetime Portfolio	2,544
Multimanager 2015 Lifetime Portfolio	2,018
Multimanager 2010 Lifetime Portfolio	1,941

**Expenses.** Within the John Hancock group of funds complex, expenses that are directly attributable to an individual portfolio are allocated to such portfolio. Expenses that are not readily attributable to a specific portfolio are allocated among all portfolios in an equitable manner, taking into consideration, among other things, the nature and type of expense and each portfolio's relative net assets. Expense estimates are accrued in the period to which they relate and adjustments are made when actual amounts are known.

**Class allocations.** Income, common expenses and realized and unrealized gains (losses) are determined at the portfolio level and allocated daily to each class of shares based on the net assets of the class. Class-specific expenses, such as distribution and service fees, if any, and transfer agent fees, for all classes, are charged daily at the class level based on the net assets of each class and the specific expense rates applicable to each class.

**Federal income taxes.** Each portfolio intends to continue to qualify as a regulated investment company by complying with the applicable provisions of the Internal Revenue Code and will not be subject to federal income tax on taxable income that is distributed to shareholders. Therefore, no federal income tax provision is required.

For federal income tax purposes, as of August 31, 2023, certain portfolios have capital loss carryforwards available to offset future net realized capital gains. The following table details the capital loss carryforwards available as of August 31, 2023:

Portfolio	No Expiration Date	
	Short Term	Long Term
Multimanager 2030 Lifetime Portfolio	\$3,340,710	\$5,903,831
Multimanager 2025 Lifetime Portfolio	5,516,489	5,403,142

Multimanager 2015 Lifetime Portfolio	588,299	469,367
Multimanager 2010 Lifetime Portfolio	339,695	383,691

As of August 31, 2023, the portfolios had no uncertain tax positions that would require financial statement recognition, derecognition or disclosure. The portfolios' federal tax returns are subject to examination by the Internal Revenue Service for a period of three years.

For federal income tax purposes, the costs of investments owned on February 29, 2024, including short-term investments, were as follows:

Portfolio	Aggregate cost	Unrealized appreciation	Unrealized (depreciation)	Net unrealized appreciation/(depreciation)
Multimanager 2065 Lifetime Portfolio	\$75,012,659	\$3,551,116	\$(603,623)	\$2,947,493

**Distribution of income and gains.** Distributions to shareholders from net investment income and net realized gains, if any, are recorded on the ex-date. The portfolios generally declare and pay dividends and capital gain distributions, if any, annually.

Distributions paid by the portfolios with respect to each class of shares are calculated in the same manner, at the same time and in the same amount, except for the effect of class level expenses that may be applied differently to each class.

Such distributions, on a tax basis, are determined in conformity with income tax regulations, which may differ from US GAAP. Distributions in excess of tax basis earnings and profits, if any, are reported in the portfolios' financial statements as a return of capital. The final determination of tax characteristics of the portfolio's distribution will occur at the end of the year and will subsequently be reported to shareholders. Short-term gains from underlying funds are treated as ordinary income for tax purposes.

Capital accounts within the financial statements are adjusted for permanent book-tax differences. These adjustments have no impact on net assets or the results of operations. Temporary book-tax differences, if any, will reverse in a subsequent period. Book-tax differences are primarily attributable to wash sale loss deferrals.

**Note 3 — Guarantees and indemnifications**

Under the Trust's organizational documents, its Officers and Trustees are indemnified against certain liabilities arising out of the performance of their duties to the Trust, including the portfolios. Additionally, in the normal course of business, the Trust enters into contracts with service providers that contain general indemnification clauses. The Trust's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Trust that have not yet occurred. The risk of material loss from such claims is considered remote.

**Note 4 — Fees and transactions with affiliates**

John Hancock Investment Management LLC (the Advisor) serves as investment advisor for the portfolios. John Hancock Investment Management Distributors LLC (the Distributor), an affiliate of the Advisor, serves as principal underwriter of the portfolios. The Advisor and the Distributor are indirect, principally owned subsidiaries of John Hancock Life Insurance Company (U.S.A.), which in turn is a subsidiary of Manulife Financial Corporation.

**Management fee.** The portfolios have an investment management agreement with the Advisor under which the portfolios pay a daily management fee to the Advisor as detailed below. The Advisor has a subadvisory agreement with Manulife Investment Management (US) LLC, an indirect, wholly owned subsidiary of Manulife Financial Corporation and an affiliate of the Advisor. The portfolios are not responsible for payment of the subadvisory fees.

The management fee has two components: (1) a fee on assets invested in a fund of the Trust or John Hancock Funds III (JHF III) (Assets in a fund of the Trust or JHF III); and (2) a fee on assets invested in investments other than a fund of the Trust or JHF III (Other assets). Aggregate net assets include the net assets of the portfolios, similar portfolios of John Hancock Variable Insurance Trust (JHVIT), and similar portfolios of the Trust. JHVIT funds are advised by an affiliate of the Advisor, John Hancock Variable Trust Advisers LLC and are distributed by an affiliate of the Advisor, John Hancock Distributors, LLC.

Management fees are determined in accordance with the following schedule:

	First \$7.5 billion of aggregate net assets	Excess over \$7.5 billion of aggregate net assets
Assets in a fund of the Trust or JHF III	0.060%	0.050%
Other assets	0.510%	0.500%

**Expense reimbursements.** The Advisor has contractually agreed to reduce its management fees or if necessary make payment to each portfolio in an amount by which certain expenses, including underlying fund expenses (acquired fund fees), exceed the amount indicated below of the respective portfolio's average net assets. This expense limitation agreement expires on December 31, 2024, unless renewed by mutual agreement of the portfolios and the Advisor based upon a determination that this is appropriate under the circumstances at that time.

Portfolio	Expense limitation as a percentage of average net assets	Portfolio	Expense limitation as a percentage of average net assets
Multimanager 2065 Lifetime Portfolio	0.58%	Multimanager 2035 Lifetime Portfolio	0.59%
Multimanager 2060 Lifetime Portfolio	0.58%	Multimanager 2030 Lifetime Portfolio	0.57%
Multimanager 2055 Lifetime Portfolio	0.59%	Multimanager 2025 Lifetime Portfolio	0.56%
Multimanager 2050 Lifetime Portfolio	0.60%	Multimanager 2020 Lifetime Portfolio	0.54%
Multimanager 2045 Lifetime Portfolio	0.58%	Multimanager 2015 Lifetime Portfolio	0.52%
Multimanager 2040 Lifetime Portfolio	0.58%	Multimanager 2010 Lifetime Portfolio	0.50%

Payments under this arrangement are intended to reimburse the portfolios for a portion of the indirect net expenses associated with the portfolios' investments in underlying funds. Amounts received in excess of portfolio level operating expenses, if any, are included as Other income received from advisor in the Statements of operations.

Additionally, the Advisor has voluntarily agreed to waive its management fee for each portfolio so that the aggregate management fee retained by the Advisor with respect to both the portfolio and its underlying investments (after payment of subadvisory fees) does not exceed 0.51% of the portfolio's first \$7.5 billion of average net assets and 0.50% of the portfolio's average net assets in excess of \$7.5 billion. The Advisor may terminate this voluntary waiver at any time upon notice to the Trust.

For the six months ended February 29, 2024, the expense reductions under these agreements amounted to the following and are reflected as a reduction of total expenses in the Statements of operations:

Expenses waived or reimbursed in the current fiscal period are not subject to recapture in future fiscal periods.

The investment management fees, including the impact of the waivers and reimbursements as described above, incurred for the six months ended February 29, 2024, were equivalent to a net annual effective rate of the portfolios' average daily net assets as follows:

**Accounting and legal services.** Pursuant to a service agreement, the portfolios reimburse the Advisor for all expenses associated with providing the administrative, financial, legal, compliance, accounting and recordkeeping services to the portfolios, including the preparation of all tax returns, periodic reports to shareholders and regulatory reports, among other services. These expenses are allocated to each share class based on its relative net assets at the time the expense was incurred. These accounting and legal services fees incurred, for the six months ended February 29, 2024, amounted to an annual rate of 0.02% of each portfolios' average daily net assets.

**Distribution and service plans.** The portfolios have a distribution agreement with the Distributor. The portfolios have adopted distribution and service plans for certain classes as detailed below pursuant to Rule 12b-1 under the 1940 Act, to pay the Distributor for services provided as the distributor of shares of the portfolios. In addition, under a service plan for certain classes as detailed below, the portfolios pay for certain other services. The portfolios may pay up to the following contractual rates of distribution and service fees under these arrangements, expressed as an annual percentage of average daily net assets for each class of the portfolios' shares:

Class	Rule 12b-1 Fee	Service fee
Class A	0.30%	—
Class R2	0.25%	0.25%
Class R4	0.25%	0.10%
Class R5	—	0.05%
Class 1	0.05%	—

The portfolios' Distributor has contractually agreed to waive 0.10% of Rule 12b-1 fees for Class R4 shares. The current waiver agreement expires on December 31, 2024, unless renewed by mutual agreement of the portfolios and the Distributor based upon a determination that this is appropriate under the circumstances at the time. This contractual waiver amounted to the following for Class R4 shares for the six months ended February 29, 2024:

Portfolio	Class R4	Portfolio	Class R4
Multimanager 2065 Lifetime Portfolio	\$29	Multimanager 2035 Lifetime Portfolio	\$105

Multimanager 2040 Lifetime Portfolio	261	Multimanager 2010 Lifetime Portfolio	31

**Sales charges.** Class A shares are assessed up-front sales charges of up to 5.00% of net asset value for such shares. The following table summarizes the net up-front sales charges received by the Distributor during the six months ended February 29, 2024:

	Multimanager 2065 Lifetime Portfolio	Multimanager 2060 Lifetime Portfolio	Multimanager 2055 Lifetime Portfolio	Multimanager 2050 Lifetime Portfolio	Multimanager 2045 Lifetime Portfolio	Multimanager 2040 Lifetime Portfolio	Multimanager 2035 Lifetime Portfolio	Multimanager 2030 Lifetime Portfolio	Multimanager 2025 Lifetime Portfolio	Multimanager 2020 Lifetime Portfolio	Multimanager 2015 Lifetime Portfolio	Multimanager 2010 Lifetime Portfolio

Class A shares may be subject to contingent deferred sales charges (CDSCs). Certain Class A shares purchased, including those that are acquired through purchases of \$1 million or more, and redeemed within one year of purchase are subject to a 1.00% sales charge. CDSCs are applied to the lesser of the current market value at the time of redemption or the original purchase cost of the shares being redeemed. Proceeds from CDSCs are used to compensate the Distributor for providing distribution-related services in connection with the sale of these shares. During the six months ended February 29, 2024, CDSCs received by the Distributor for Class A shares were as follows:

Portfolio	Class A
Multimanager 2055 Lifetime Portfolio	\$147
Multimanager 2035 Lifetime Portfolio	16

**Transfer agent fees.** The John Hancock group of funds has a complex-wide transfer agent agreement with John Hancock Signature Services, Inc. (Signature Services), an affiliate of the Advisor. The transfer agent fees paid to Signature Services are determined based on the cost to Signature Services (Signature Services Cost) of providing recordkeeping services. It also includes out-of-pocket expenses, including payments made to third-parties for recordkeeping services provided to their clients who invest in one or more John Hancock funds. In addition, Signature Services Cost may be reduced by certain fees that Signature Services receives in connection with retirement and small accounts. Signature Services Cost is calculated monthly and allocated, as applicable, to five categories of share classes: Retail Share and Institutional Share Classes of Non-Municipal Bond Funds, Class R6 Shares, Retirement Share Classes and Municipal Bond Share Classes. Within each of these categories, the applicable costs are allocated to the affected John Hancock affiliated funds and/or classes, based on the relative average daily net assets.
